PROFILE

International and bilingual (full English proficiency, Spanish native) technology professional with experience governing and enforcing AI, productivity and infrastructure agreements for financial and governmental institutions in Latin America. Master in Internet Equalities with expertise in how full-stack technologies can impact business and society and oriented towards AI risk and governance. I write publicly about technology governance and digital culture in a playful, accessible voice for a broad public.

EXPERIENCE

Researcher, MA Internet Equalities | University of the Arts London, Creative Computing Institute *2025 – present*

- Driven by an interest in the evolving risks of AI and emerging technologies: research how cataloguing, metadata and digitisation decisions re-encode exclusion in institutional archives (thesis: the invisibilisation of care in photographic archives and contemporary social media). Assessed generative AI image outputs (ComfyUI) for bias risks in depictions of Latin American families. Built ethical framework staged at the International Conference of Social Robotics in London.

Commercial Executive | Microsoft LATAM (Mexico, Argentina, Uruguay, Chile) *2021 – 2025*

- Worked with technical and non-technical stakeholders, translating licensing terms, T&Cs and consumption models into clear recommendations for senior leaders; coordinated legal, compliance, finance, deal desk and partner teams to meet public procurement and regulated-sector requirements for major universities* banks and government secretariats in Chile; traced billing errors to their root cause in Power BI source tables; designed and ran a T-12 preventive control methodology, tracked with Power BI and Excel reporting, that started contract review 12 months before expiry.
- Achieved a 130%+ renewal and win rate across 5–10 concurrent enterprise, 20–30 corporate and 40–60 SMB renewals; structured a $7M+ agreement with a mayor financial institution* including a $3M Azure commitment; preserved Argentina's government accounts through the 2023 change of administration; managed a portfolio of 500+ SMB, 100+ corporate and 30+ enterprise accounts; named Sustainability Champion for Microsoft Mexico, leading internal learning sessions (2023–2024).
- Proactively co-founded the Indigenous pillar employee resource group. Built the case for a Mexican pillar grounded in national data (19.4% of Mexico's population, INEGI Census 2020); co-led the group's agenda and designed a joint public event with the Museum of the National Institute of Indigenous Peoples (INPI). Grew the pillar to ~20 members.

Partner Technology Strategist | Microsoft Mexico *2020 – 2021*

- Enabled Microsoft's partner ecosystem in Mexico to build technical capabilities and meet Microsoft's certification standards (Silver and Gold competencies). Designed enablement content and upselling/cross-selling playbooks, guided partners through onboarding and certification requirements, and supported partners integrating their own IP into Microsoft marketplaces.

Payments & Risk Analyst | Grow (formerly Flinto), Mexico *2019 – 2021*

- Wrote SQL queries to monitor transaction, fraud and chargeback risk across Stripe, Conekta and Adyen, built Tableau dashboards and reported risk indicators to leadership: early grounding in operational and financial-risk controls and consumer protection in digital payments. Contributed to a reduction in chargeback rates through ongoing data-driven risk monitoring and analysis and kept the risk function running without interruption through the acquisition.

EARLY CAREER, VOLUNTEERING

Project Advisor | SEDESU, Secretariat of Sustainable Development, Mexico *2020*

- Assessed and monitored technology implementation projects within the State Programme for Technology and Innovation Development, evaluating progress and risks against sustainable development goals.

Museum Volunteer | INPI, National Institute of Indigenous Peoples, Mexico City *2023 – 2024*

- Guided diverse visitor groups, including school tours, through exhibitions on Indigenous histories, adapting communication to each audience.

OTHER EDUCATION, CERTIFICATIONS AND AI SKILLS

Bachelors in Sociology (open) | Universidad Nacional Autonoma de Mexico (UNAM) *2018 – 2023*

BSc Industrial Engineering & Innovation Mgmt. | Universidad Panamericana (exchange: Korea University) *2017 – 2022*

Internet Governance; AI Fluency (certificate) | Internet Society; Anthropic *2026*

Coding languages (basic) | SQL, HTML, P5.js
With experience using Supa base, Comfy UI, Claude Code, and full domain of M365 Suite.
